Consensus Polls:

04/10: AAI: Back in October Bulls% fell to 20.3%. In this sell-off the lowest has been 29.7%, which was four weeks ago, this week at 36.6%. Bears% is at 44.7% having reached 52.1% two weeks ago, which was the highest since April 2013. The 4wkma of nett (Bulls minus Bears) is at -14.88 but fell to -18.25 previous week, the lowest in this sell-off but not an extreme reading, this was lower in August.

04/10: The NAAIM Exposure Index was higher at 26.74. Three weeks ago the index collapsed to 10.65, down from 87.91 in February and the lowest reading since Oct 2014.

04/10: Investors Intelligence. Bulls% was higher at 33.3%. Bears% is lower at 36.2%. Bears exceed Bulls as they did previous week and w/e 03/27, the first time since early Jan 2019. Historically this has usually marked a low in a bull market or the start of a rally in a bear market. The 4wk ma of nett (Bulls minus Bears) has been negative for two weeks and again, historically this has been bullish for at least a multi-week rally.

Mutual Fund Flow:

04/09: My version of the Rydex Assets Ratio ended the week at 5.64. The index fell to 3.35 on 03/17, the lowest since early 2016. The S&P has rallied strongly since the 03/23 low, the ratio has not. That's probably a positive.

04/10: lipperusfundflows reported Equity Fund (inc ETF) inflows of \$8.1 Billion in week to 8th April. The 4week flow is a -\$29.9 Billion outflow but reached -\$66.4 Billion two weeks ago, the lowest in the database apart from December 2018. VIX

03/20: VIX reached a record close of 82.69 on 03/16.

Options Ratios:

03/20: OCC Call%10ma fell to 44.7 on 03/18, the lowest since December 2015.

01/03: ISEE Index (equities only) 10ma reached a multi year high this week.

VIX - S&P 500 Volatility Index (Daily)

03/20: VIX reached a record close of 82.69 on 03/16.

03/27: lipperusfundflows reported Equity Fund (inc ETF) outflows of -\$27.1 Billion in week to 25th March, which is huge outflow and brings the outflow over four weeks to -\$66.4 Billion. Adding another week and looking at five weeks, which is since the market sell-off began, the outflow over that period is -\$88.5 Billion and nothing in my database comes close to that except Dec '18 which was a slightly higher outflow but came at year end and after a three-month market decline.

04/10: lipperusfundflows reported Equity Fund (inc. ETF) inflows of \$8.1 Billion in week to 8th April. The 4week flow is a -\$29.9 Billion outflow but reached -\$66.4 Billion two weeks ago, the lowest in the database apart from December 2018.

SPX + Lipper Total Equity Fund Flow (inc ETF activity)

S&P 500

On 12/27 the index reached 28.62, the highest reading in my database. Only twice before has the ratio printed above 26. Once in Jan 2018 and the market sold-off quickly, and once in Aug 2018 after which the market traded sideways for a month and then sold-off.
